

P.V CONTINUOUS INDUCTION SEALERS

Continuous Induction Sealers are highly efficient machines designed to seal a wide range of containers and bottles in production environments. They are ideal for industries such as food and beverage, pharmaceuticals, cosmetics, and chemicals. These sealers create tamper-evident and airtight seals that enhance product safety and extend shelf life. Operating in a continuous motion, they can accommodate high-volume packaging lines, improving productivity and reducing labor costs. With adjustable settings, they can handle various container sizes and materials, ensuring versatility.

Model	PV-CIS80	PV-CIS130
Product Type	Continuous Induction Sealer	Continuous Induction Sealer
Sealing Diameter (mm)	20-80	25-130
Suitable Height of the Bottle (mm)	40-400	40-400
Material	Stainless Steel	Stainless Steel
Voltage (V)	240	240
Power (W)	600	1500
Dimension (mm)	1550*550*1350	1550*550*1350
Weight (Kg)	35.00	38.00
