

## P.V External Vacuum Sealer

An external vacuum sealing machine is a valuable appliance designed to preserve food and extend its shelf life by effectively removing air from specially designed bags. This process prevents oxidation and inhibits the growth of harmful bacteria, mold, and yeast, making it an essential tool in both home and commercial kitchens. External vacuum sealers have a wide range of applications. In food storage, they are particularly effective for sealing vegetables, dry goods etc.

Model	PV-EVS300
Product Type	External Vacuum Sealer
Sealing Length (mm)	300
Sealing Width (mm)	10
Voltage (V)	240
Power (W)	1300
Vacuum Capacity (Mpa)	0.035 (Approx.)
Material	Plastic
Dimension (mm)	370*140*73
Weight (Kg)	2.5
