

P.V MANUAL CROWN CAP SEALING MACHINE

The Manual Crown Cap Sealing Machine is a vital piece of equipment for breweries, wineries, and beverage manufacturers who prioritize quality and efficiency. It is designed to securely seal glass bottles with crown caps, ensuring that products maintain their freshness and integrity. This machine is ideal for sealing craft beer, cider, soda, and homemade beverages. Constructed from durable materials, the machine can withstand frequent use while providing a reliable sealing process. Its manual operation allows for precise control, enabling users to apply the correct force for a tight seal, which is crucial for maintaining carbonation and preventing contamination. The machine accommodates various bottle sizes, making it suitable for both small-scale production and larger batch operations. Its compact design allows for easy placement on workbenches, saving valuable space in production areas.

Model	PV-CCSM330M
Product Type	Crown Capping Machine
Cap	Crown Caps
Bottle Height (mm)	330
Dimension (mm)	115*190*500
Weight (Kg)	7.5 (Approx.)
