

P.V MANUAL PLASTIC BOTTLE CAP SEALING MACHINE

The Manual Plastic Bottle Cap Sealing Machine is an essential tool for small-scale production and packaging operations. It is designed for ease of use, allowing users to securely seal various types of plastic bottle caps to ensure product freshness and safety. Constructed with durable materials, it offers longevity and reliability in high-demand environments. The machine operates manually, making it ideal for businesses that require mobility or have limited space. Its compact design means it can fit easily on workbenches or in storage areas. This sealing machine is compatible with a variety of bottle sizes and cap styles, providing versatility for different products. The simple mechanism allows for quick adjustments, making it user-friendly for operators of all skill levels

Model	PV-PBCSM50M
Product Type	Electric Caping Machine
Capping Diameter (mm)	10-50
Cable Length (mm)	1.75
Voltage (V)	240
Power (W)	80
Production Capacity (bottles/min)	30-90 (Approx.)
Dimension (mm)	70*70*350
Weight (kg)	150 (Approx.)
