

P.V MANUAL ROPP CAP SEALING MACHINE

The Manual ROPP (Roll-On Pilfer Proof) Cap Sealing Machine is a valuable asset for wineries, breweries, and manufacturers of beverages and oils. It is designed for ease of use and provides a reliable solution for securely sealing ROPP caps onto glass or plastic bottles, ensuring product integrity and freshness. Constructed from high-quality materials, it offers durability and longevity, making it suitable for various production environments. The manual operation allows for greater control and flexibility, enabling operators to seal bottles quickly and efficiently, even in small-scale production settings.

Model	PV-RCSM28M
Product Type	Cap Sealing Machine
Sealing Size (mm)	22, 25, 28
Packaging type	Aluminium Cap threading
Production Capacity (bottles/hour)	600 (Approx.)
Material	Cast iron and Mild Steel
Weight (kg)	18 (Approx.)
