

P.V PORTABLE INDUCTION SEALERS

Portable induction sealers are versatile and efficient tools used for sealing containers and bottles across various industries. They are ideal for sealing food and beverage products, pharmaceuticals, cosmetics, and chemical packaging, providing tamper-evident seals that enhance product safety and shelf life. Their compact and lightweight design makes them easy to transport, allowing for on-site sealing in warehouses, production lines, or retail environments.

Model	PV-PIS80	PV-PIS100
Product Type	Portable Induction Sealer	Portable Induction Sealer
Sealing Diameter (mm)	20-80	20-100
Material	Plastic, Aluminium	Plastic, Aluminium
Voltage (V)	240	240
Power (W)	500	500
Dimension (mm)	280*230*115	340*290*150
Weight (Kg)	3.00	8.00
