

P.V SEMI-AUTOMATIC SCREW CAP SEALING MACHINE

The Semi-Automatic Screw Cap Sealing Machine is a versatile and efficient solution for businesses aiming to streamline their bottling processes. It is ideal for various industries, including pharmaceuticals, cosmetics, and food and beverages. This machine ensures a secure and consistent seal on screw caps, which enhances product integrity and shelf life. Engineered for reliability, the semi-automatic design allows operators to maintain control while significantly increasing production speed. Users can easily place bottles and caps, while the machine automatically handles the sealing process, minimizing labor costs and reducing fatigue. Its adjustable settings accommodate different bottle sizes and cap types, providing flexibility for manufacturers with diverse product lines.

Model	PV-SCSM50S
Product Type	Semi-automatic Capping Machine
Capping Diameter (mm)	10-50
Bottle Height (mm)	40-200
Voltage (V)	240
Capping Speed (bottles/min)	10-15 (Approx.)
Dimension (mm)	520*300*530
Weight (Kg)	35 (Approx.)
