

P.V SINGLE NOZZLE PNEUMATIC PASTE FILLER

The single-nozzle pneumatic paste filler is a highly efficient machine designed for accurately filling containers with paste-like substances. It uses pneumatic pressure to provide controlled dispensing, making it perfect for a variety of viscous products such as creams, sauces, and adhesives. The machine is equipped with a hopper for holding the paste and a single nozzle for dispensing the product, allowing for precise filling, reduced product waste, and consistency across batches. The adjustable filling volume can accommodate different container sizes, making it versatile for production. This filler has wide applications, including filling jars with condiments, dressings, and spreads in the food industry, packaging lotions, gels, and creams in the cosmetics industry, and filling ointments and other medicated pastes in the pharmaceutical sector.

Model	PV-POPF50	PV-PPF100S	PV-PPF500S	PV-PPF1000S
Product Type	Pedal-Operated Paste Filler	Single Nozzle Pneumatic Paste Filler	Single Nozzle Pneumatic Paste Filler	Single Nozzle Pneumatic Paste Filler
Filling Volume (ml)	5-50	10-100	50-500	100-1000
Deviation (%)	1-2	1-2	1-2	1-2
Material	Stainless Steel	Stainless Steel	Stainless Steel	Stainless Steel
Voltage (V)	240	240	240	240
Air Supply (LPM)	200	200	200	200
Air Pressure (Mpa)	0.6	0.6	0.6	0.6
